Disease Claim: Ineligible for a Disease Review - Class 7

RE:

Dear Claimant or Attorney:

Section 6.04(h) (ii) of Annex A to the Dow Corning Settlement Facility and Fund Distribution Agreement states that in order to receive a disease payment from the Class 7 Silicone Materials Fund, the Claim Form along with supporting documentation must be submitted on or before two years after the "Effective date" or June 1, 2006 deadline.

We have reviewed your Class 7 disease claim and have determined that you are not eligible for a Class 7 Silicone Materials Disease payment. The reason for this is, after a thorough review of your file, we do not find any medical records that support either a compensable disease or disability level. Since you failed to submit all of the required documentation before the June 1, 2006 deadline, you are not eligible for a disease payment from the Class 7 Fund.

Also, we did consider your claim for the \$600 Expedited Release payment. However, under the Plan, the amount you previously received from the Revised Settlement Program (RSP), the Foreign Settlement Program (FSP), or from certain other breast implant manufacturers must be deducted from any Class 7 award. Because you received a payment from the RSP, FSP, or Bristol, Baxter, or 3M, which is equal to more than the \$600 Expedited Release payment, then your award, is reduced to zero.

If you have different information about the amount you received from the other breast implant manufacturers or you have proof that the supporting disease documents were previously submitted, you must write to us within 6 months from the date of this letter and provide the information on which you are relying why our decision is incorrect. If you do not respond within the 6 months, your claim will be closed.

If you have questions about our letter, please consult with your attorney or if you are not represented, please call the Claims Assistance Department @ 1-866-874-6099.

Sincerely,
Settlement Facility-Dow Corning Trust
