I. CHEMISTRY/DEGRADATION.....	1
II. EPIDEMIOLOGY.....	58
III. IMMUNOLOGY/PATHOLOGY.....	148
IV. RHEUMATOLOGY.....	321
V. TOXICOLOGY.....	498
VI. NEUROLOGICAL PAPERS.....	657
VII. POSITION STATEMENTS.....	664

Referenced materials within each of above categories are arranged in following order:

1.First, by “priority”. PR 1 means those materials identified by plaintiffs or defendants (or both) as primary sources most often referred to by the parties’ experts during direct or cross examination. PR 2, 3, and 4 may be useful in understanding and evaluating the primary sources.

2.Then, by date. Note that these are “soft dates” in that 00/00/86 would be used to indicate 1986 and 05/00/86 would be used to indicate May 1986.

3.Then, by name of first-listed author.

Some references appear under more than one category, and some reflect special topic information.

Inclusion of these references does not indicate any evaluation by the court as to their weight or significance, nor does it indicate any agreement by the parties as to the appropriateness of such references. For the most part, items have been included in the bibliography if either plaintiffs or defendants requested inclusion.

I. CHEMISTRY/DEGRADATION.
